STEPSONIC Technology

- Works on principles of Ultra Sound
- Selectively destroys Algae of all kinds
- Does not harm other aquatic life
- Reduces BOD, COD
- Reduces Turbidity
- Helps in reduction of Ammonia, pH
- Low energy at 18 watts per hour per unit
- Unit range 200 mts.

Advantages

- Reduces and control algae in the ponds and lakes in an efficient, cost-effective manner
- Prevents further algae growth
- Reduces toxins by enhancing the degradation rate of toxins produced by the blue-green algae (cyanobacteria), also primarily by the control of blue-green algae itself.
- Does not harm water plants, fish, frogs, zooplankton, prawns and other types of life present in the water.
- Does not harm the ecosystem
- 100% environmentally friendly
- Does not harm the environment does not need chemicals
